

DB-4000 Destruction Device

DATA SECURITY, INC.®

DB-4000

NSA APPROVED
DISK DRIVE BENDER

Fast, Easy, and Clean Media Destruction

KEY FEATURES:

- Listed in the National Security Agency (NSA) CSS Evaluated Products List for Hard Drive Destruction.
- Meets DoD compliance guidelines for the physical damage of media, as well as emergency destruction procedures.
- Largest chamber in an automatic destruction device, accommodating the largest media formats and quantities per cycle.
- Built to last; indestructible ram requires no preventative maintenance or expensive repairs.
- Internal brain with self-healing capabilities to prevent and auto-correct jams.
- Simple, automatic push button operation, designed for reliability, performance, and operator safety.
- Compact and lightweight; perfect for on-site or mobile destruction.

PERFORMANCE:

Simply open the door and insert a hard drive. With single button operation, the powerful ram of the DB-4000 descends on the media. The indestructible ram develops 40,000 psi on the hard drive, a powerful force that bends, folds, and shatters the platters and circuitry of the drive, rendering it unusable.

SAFETY CONTROLS:

The DB-4000 is designed with safety in mind. When the safety door is open, the ram locks into place preventing operation. The door itself is made of a shatterproof, yet transparent material that allows the user to view inside while protecting the operator from flying debris, a common result from the damaging process. In the event of an emergency, a manual stop button immediately halts the operation of the machine. Clean up is quick, safe, and easy with a removable debris collection tray.

Technology	Portable device uses force to physically destroy hard disk drives
Operation	Automatic (push button)
Media Size	Accommodates all media up to 4" x 6" x 1.63" (102mm x 152mm x 41mm) and able to accept multiple pieces of media per cycle
Form Factors	Accommodates 3.5 inch full and half height, 2.5 inch, 1.8 inch and smaller HDDs
Cycle Time	12 seconds
Duty Cycle	Continuous
NSA Tested Throughput	175 HDDs/ hr
Power	120V/2A/60Hz or 230V/1.5A/50Hz
Vibration	Designed to withstand commercial shipping and handling conditions
Acoustics	The DB-4000 itself is silent and vibration free; faint cracking or popping may be heard from the media as it's crushed
Dimensions	13.2" W x 14" D x 15.4" H 335mm W x 356mm D x 391mm H
Weight	100 lbs / 45.4 kg
Accessories	Optional wheeled cart or deployment case available.
Manufacturer	Made in the USA by Data Security, Inc. 1-800-225-7554 www.DataSecurityInc.com

Specifications subject to change without notice.

Note: The DB-4000 will not provide any erasure of hard disk drives; it is recommended that hard disk drives be erased by an NSA evaluated degausser prior to destruction.

DB-4000 Destruction Device

The DB-4000 is Built to Destroy Multiple Hard Disk Drives During a Single Cycle

half-height hard drive	1
third-height hard drive	1
3/4" laptop hard drive	4
1/2" laptop hard drive	6

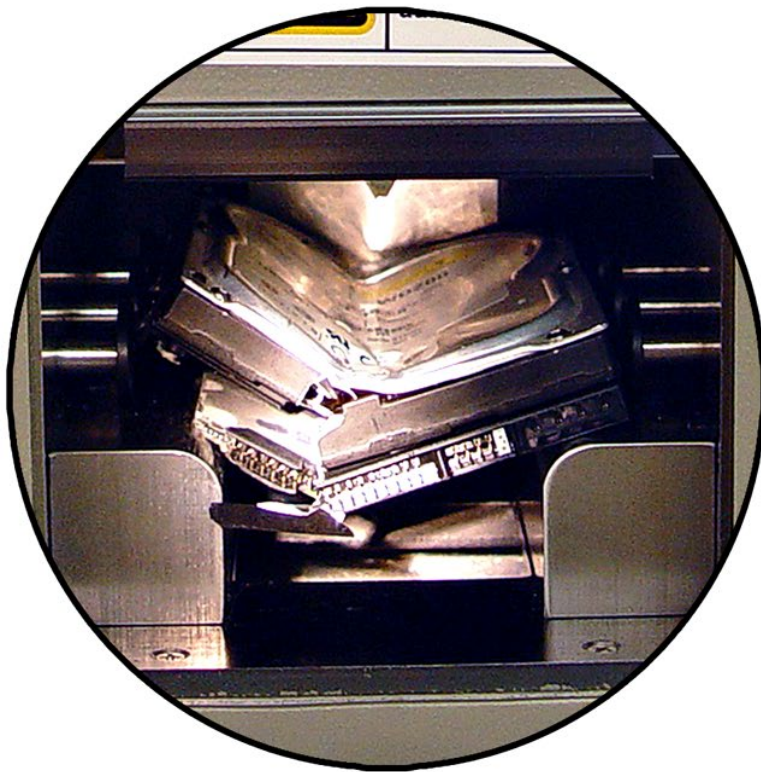

The DB-4000 Destruction Device accommodates the following HDD form factors: 3.5 inch half height, 3.5 inch third height, 2.5 inch, 1.8 inch and smaller.

SAFE AND EFFICIENT DESTRUCTION

The chamber of the DB-4000 accepts a wide variety of media up to 4" by 6" by 1.76" (102mm x 152mm x 41mm). Due to this larger chamber size, thinner laptop drives (up to 6) can be stacked inside the chamber and damaged simultaneously, resulting in greater time efficiency.

DEGAUSS THEN DESTROY

Department of Defense magnetic media sanitization regulations require the use of an approved degausser, at minimum. In addition, they recommend degaussing be followed by physical damage prior to disposal. For complete compliance, pair the DB-4000 with a degausser listed in the National Security Agency's Evaluated Products List-Degausser.

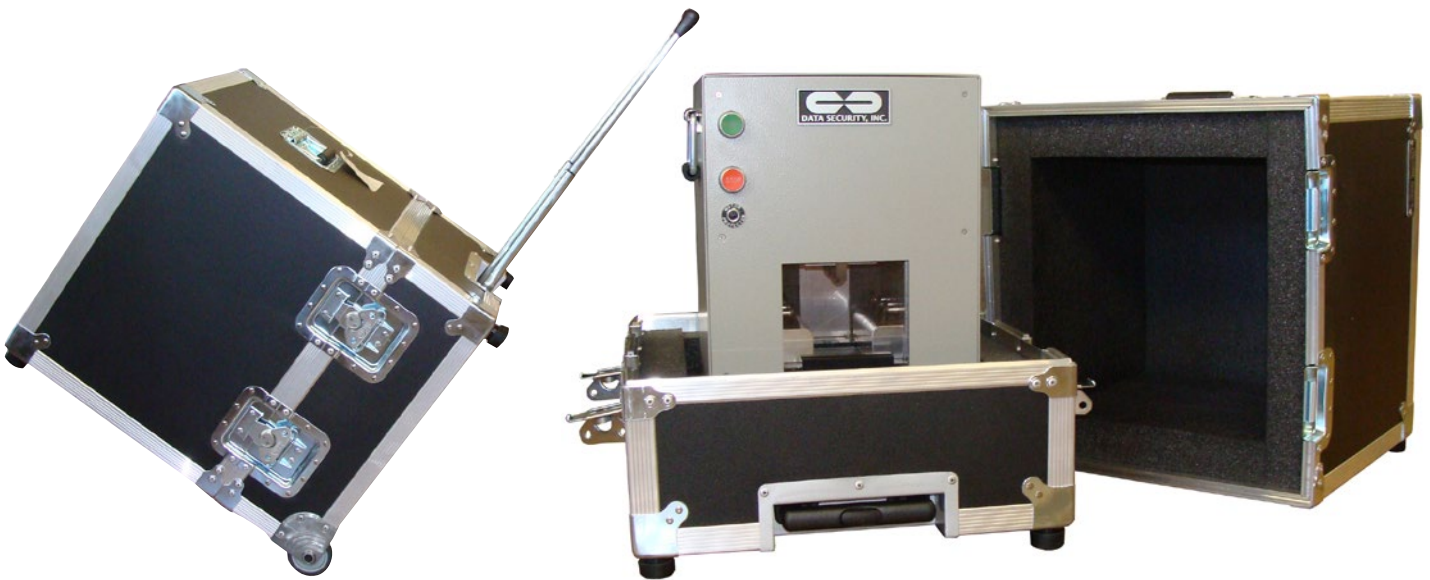

The DB-4000 damages multiple drives simultaneously for fast, efficient destruction.

DB-4000 Deployment Case

YOUR PORTABILITY SOLUTION:

With the DB-4000 Deployment Case, you have the ability to safely take your destruction anywhere it's needed. Heavy-duty, impact-resistant with custom molded interior padding will ensure your DB-4000 is protected when moved from one location to the next. With telescoping handle and durable wheels, you have the freedom to roll the DB-4000 to the media instead of bringing the media to you.

Made of durable, impact resistant high density polyethylene with reinforced steel corners, the DB-4000 Deployment Case includes a heavy-duty, locking latch system for the safe transport of your valued investment.

Use/Operation	For the safe shipment, storage, and operation of Data Security, Inc.'s DB-4000 Destruction Device
Dimensions	20" W x 20" D x 25" H 508mm W x 508mm D x 635mm H
Weight	34 lbs / 15.5 kg
Mobility	Telescoping handle, wheels, lockable latches
Retailer	Data Security, Inc. 1-800-225-7554 www.DataSecurityInc.com
